Action of Light on Plants. Flowers Turn to the Light-Poison from the Potato-Are House-Plants Injurious to Health?-Rays of the Sun which Cause no Light or Heat-Pear-tree Blight ascribed to

the Chemical Rays-Daguerreotype Process -Mountight has no Heat-Effect of the Moon The intelligent cultivator should have nowledge of various other laws of nature,

besides those which are properly classed as FARMS IN MARION COUNTY. trictly chemical forces.

No. 18. 70 acres 5 miles south of Indhanapolis, lu Some of the phenomena of the action of ight on vegetation, are not only subjects of urions investigation, but of practical importnce. Any lady who cultivates flowers in her parlor, who has watched and tended them, iving them air and water, and more than all me portion of her love, has been struck with neir manifest ingratitude, in persisting always averting their radiant faces from their kind enefactress, and bestowing their favors upon very strolling passenger in the street. Flowers are attracted towards the light.-

n the same way, vines, which are growing in lark places, like potato-sprouts in a cellar, nvariably seek every opening where the light is seen, as if they felt the damp chill of their prison house, and pined for the refreshing No. 436. 320 acres 9% miles from Indianapolis, on beams of the glorious sun. From the white he Bellefontaine Railroad, 200 acres cultivated, brick sprouts of the potato, grown in darkness, a leadly poison, called Solanino, is extracted, and yet the effect of light upon the potato itself, as every farmer knows, is to render it disagreeable in taste, and unfit for food. The plant, called Portulacaria, it is said, is daily changed, by the influence of light, so that, to the taste, in the morning, at noon and

at evening, it changes from being perceptibly The question is often asked, whether plants in the house are injurious to health. This question is readily answered. Carbonic acid. gas, which is unsuited to respiration, and which is generated by the breathing of ani-No. 552. 84 acres land 1 mile east of Donation mals, is the appropriate nourishment for plants.
